`import matplotlib.pyplot as plt`

ChatGPT Prompt:
"Give me a simple Python Seaborn code snippet to export
a heatmap as a 1200 DPI SVG file."

Load CSV file
`df = pd.read_csv("heatmap_data.csv")`

```

# Calculate correlation
correlation = df.corr(numeric_only=True)

# Create heatmap
sns.heatmap(
    correlation,
    annot=True,
    cmap="coolwarm"
)

# Add title
plt.title("Correlation Heatmap")

# Save as SVG
plt.savefig(
    "correlation_heatmap.svg",
    format="svg",
    dpi=1200,
    bbox_inches="tight"
)

# Display chart
plt.show()

```
